

## Suburban infection rates

Combining Illinois Department of Public Health coronavirus records and U.S. Census Bureau population figures for suburban ZIP codes, we are able to gain a greater understanding of the level of infection within our communities. This graphic shows how many people are infected for every 10,000 residents within a ZIP code. For places with less than 10,000 residents, the rate is based on infections for every 1,000 residents.
